Table S4. Lost and new macroalgal species with respect to the overall species pool recorded before 1990. Data are also reported separately for the Italian and the Slovenian coasts (see Fig. 1 in the main document). Lost and gained species are provided for Rhodophyta, Chlorophyta and Phaeophyceae, as well as separately for Atlantic and Circumboreal (A/CB), Mediterranean (M), Pantropical and Indo-Pacific (IP/P), and Cosmopolitan (C) species.
