TECHNICAL PAPERS

Scroll to the title and select a **Blue** link to open a paper. After viewing the paper, use the bookmarks to the left to return to the beginning of the Table of Contents.

* Presentation only, no paper appears in the proceedings

Electric Ship Design Tools for MVDC

Chair: Terry Ericsen, *Ericsen Innovations, LLC*

Design Paradigm for Power Electronics-Based DC Distribution Systems ..... *
Harish Suryanarayana, Scott Sudhoff

Incorporation of Control Systems in Early Stage Conceptual Ship Designs 1
Herbert L. Ginn, Enrico Santi, Blake Langland, Angelo Ferraro, Silvia Arrua, Hessamaldin Abdollahi

Control System Modeling in Early-Stage Simulation for Cyber Vulnerability Assessment 9
Allen W. Flath III, Aaron M. Cramer, Xiao Liu

Impact of Switching Frequency and Edge Rates on Common-Mode Current in MVDC Microgrids 16
Aaron D. Brovont, Steven D. Pekarek

Co-Simulation of Electric Ship Power and Control Systems using High Performance Computing 25
Michael S. Mazzola, Tomasz Haupt, Gregory Henley, Angela Card, Jian Shi

DC Fault Protection and Other Topics

Chair: Harish Suryanarayana, *ABB Inc*

DC Fault Current Control of Modular Multilevel Converter with SiC-Based Power Electronics Building Blocks 30
Jianghui Yu, Rolando Burgos, Niloofar Rashidi Mehrabadi, Dushan Boroyevich

Comparative Study of the DC-DC Power Conversion Module based on Dual Active Bridge Converter and Modular Multilevel Converter for Shipboard MVDC System 36
Ren Xie, Ran Mo, Yanjun Shi, Hui Li

AC-DC Interface Converters for MW-Scale MVDC Distribution Systems: A Survey 44
Daniele Bosich, Rosa Anna Mastromauro, Giorgio Sulligoi

Effects of Parasitic Inductance on Performance of 600-V GaN Devices 50
Andrew J. Sellers, Cheikh Tine, Roshan L. Kini, Michael R. Hontz, Raghav Khanna, Andrew N. Lemmon, Ali Shahabi, Christopher New

A Feeder Protection Method Against the Phase-Phase Fault using Symmetrical Components 56
Catalin Iosif Ciontea, Claus Leth Bak, Frede Blaabjerg, Kjeld Kilsgaard Madsen, Claes Høll Sterregaard

Cabling, Grounding, and Common-Mode Current

Chair: Michael Mazzola, *Mississippi State University*

MVDC Grounding and Common Mode Current Control 64
Norbert H. Doerry, John V. Amy Jr.

A Coupled Thermal/Electric Circuit Model for Design of MVDC Ship Cables 71
Xiang Zhang, Steven Pekarek

Common-Mode Equivalent Modeling of a Notional Two-Zone MVDC Ship Power System 79
M. Bosworth, H. Ravindra, M. Steurer, S. Pekarek

Common-Mode/Differential-Mode Interactions in Asymmetric Converter Structures 84
Aaron D. Brovont, Andrew N. Lemmon

Modular Integrated Power Corridor 91
C.M. Cooke, C. Chryssostomidis, J. Chalfant

Electric Ship Design Tools for Early-Stage Ship Design I

Chair: Norbert Doerry, *Naval Sea Systems Command (SEA 05TD)*

Using S3D to Analyze Ship System Alternatives for a 100 MW 10,000 Ton Surface Combatant 96
Richard Smart, Julie Chalfant, John Herbst, Blake Langland, Angela Card, Rod Leonard, Angelo Gattozzi

Smart Ship System Design (S3D) Integration with the Leading Edge Architecture for Prototyping Systems (LEAPS) 104
Julie Chalfant, Blake Langland, Douglas Rigterink, Cullen Sarles, Peter McCauley, David Woodward, Alan Brown, Robert Ames

Application of Templates to Early-Stage Ship Design 111
Julie Chalfant, Chryssostomos Chryssostomidis

Power Converter Metamodeling Approach for the Smart Ship Design Environment 118
Robert Cuzner, Shaun Cruz, Frank Ferrese, Rasoul Hosseini

Automatic Synthesis of Detailed Designs from Early-Stage Conceptual Designs 126
Blake Langland, Rodrigo A. Leonard, Helder Pais, R.A. Dougal

Dialogue Session

Chair: Rolando Burgos, *Virgina Tech University*

High-Speed Simulation of Modular Multilevel Converters for Optimization based Design 134
Raj Sahu, Scott D. Sudhoff

Application of STATCOM for MVDC Shipboard Power System 142
Maziar Babaei, Ruhollah Jafari-Marandi, Sherif Abdelwahed, Brian Smith

A Novel Multi-Objective Security-Constrained Power Management for Isolated Microgrids in All-Electric Ships 148
Vahid Sarfi, Hanif Livani

Investigation and Performance Evaluation of Differential Protection of Phase-Shifted Transformers in an MV Drive 156
Zhen Ye, Jeff Fischer, Craig Goshaw, Benjamin Martin

Set-Based Design for Naval Shipboard Power Systems using Pertinent Metrics from Product Development Tools 164
T. Toshon, R.R. Soman, C.T. Wiegand, M. Israel, M.O. Faruque, M. Steurer

Reduced Order Multi-Rate LQR Controllers for a MVDC Shipboard Electric Distribution System with Constant Power Loads 170
Adam J. Mills, Robert W. Ashton

Stability of High-Bandwidth Power Electronic Systems with Transmission Lines 176
Jason Neely, Jarod Delhotal, Lee Rashkin, Steven Glover

Electrical Energy Storage for Dynamic Positiong Operations: Investigation of Three Application Case 182
M. Godjevac, K. Visser, E.J. Boonen, C. Malikouti, B.T.W. Mestemaker, Z. Lyu, F. van der Veen

Solid-State Fault Current Limiting for DC Distribution Protection 187
L. Qi, J. Pan, X. Huang, X. Feng

Energy Storage Management for MVDC Power System of All Electric Ship Under Different Load Conditions 192
Mohammed Masum Siraj Khan, M.O. Faruque

Ship to Shore Electric Interconnection: From Adolescence to Maturity 200
J. Prousalidis, D. Lyridis, S. Dallas, V. Georgiou, D. Spathis, Z. Soghomonian, T. Kourmpelis, P. Mitrou

Optimal Sensor Placement for MVDC Ship Power System 207
Hesan Vahedi, Dallas Perkins, David Gonsoulin, Tuyen Vu, Chris S. Edrington

Seamless Inverter Control Scheme for Shore-to-Ship Application 212
Hesan Vahedi, David Gonsoulin, Dallas Perkins, Tuyen Vu, Chris S. Edrington

Power Density Comparison of Three-Phase AC Inductor Architectures 217
Veda Samhitha Duppalli, Scott Sudhoff

Early Stage Design Evaluation of Shipboard Power Systems using Multi-Period Power Flow 225
Eun Oh, Daniel F. Opila, John Stevens, Edwin Zivi, Aaron Cramer

Torque Enhancement and Re-Rating of Medium-Voltage Induction Machines using Nano-Structured Stator Winding Insulation 232
Yiqi Liu, Hiep Nguyen, Ali M. Bazzi, Yang Cao

Hybrid Energy Storage Module for Large-Scale Ship Pulsed Power 238
Stephen B. Kuznetsov

Power Converter Design Options for the 12 kVdc Bus System 246
A.L. Gattozzi, S.M. Strank, S.P. Pish, J.D. Herbst, R.E. Hebner, F.D. Engelkemeir

Undersea Medium Voltage DC Power Distribution 251
Marcel P.J. Gaudreau, Neal Butler, Matthew Munderville

Reconfiguration of MVDC Shipboard Power Systems: A Model Predictive Control Approach 253
Nasibeh Zohrabi, Sherif Abdelwahed, Jian Shi

Novel Composite Structures for Smaller, Lighter Advanced Rotating Machines ..... *
Scott Pish, Jon Hahne, Joe Beno, Hamid Ouroua, Matt Tillman, Richard Hayes

The Cost of Model Accuracy in the Design of Wound Rotor Synchronous Machines for DC Generation 259
P.R. O'Regan, S.D. Pekarek

Robust Voltage Control in Large Multi-Converter MVDC Power Systems on Ships using Thyristor Interface Converters 267
Daniele Bosich, Andrea Vicenzutti, Giorgio Sulligoi

Nanostructured Insulation for High Torque Density Electric Propulsion Motors 274
Hiep Nguyen, Yiqi Liu, Weiqiang Chen, Mona Ghassemi, Jack Chapman, Ali Bazzi, Yang Cao

Modelling Methodology for Analysis of Shipboard Power Systems with Multiple Superconducting Devices 280
Sharath Satyanarayana, Sastry V. Pamidi, Lukas Graber, Jin-Geun Kim, Chul H. Kim

Multiphysics Model of a Notional All-Electric Ship Railgun – Model Development and Application 285
Sam Yang, Mauricio Chagas, Juan Ordonez, Jose Vargas

Practical Considerations for the Design of a Superconducting Gas-Insulated Transmission Line for Shipboard Applications 292
Peter Cheetham, Chul H. Kim, Lukas Graber, Sastry Pamidi

Analyzing the Effectiveness of dI/dt and Current Differential Fault Detection Methods in Zonal MVDC Shipboard Power Systems ..... *
Harsha Ravindra, Mark Stanovich, Tony Challita, Michael - Mischa Steurer

1000V Lithium Ion Battery Module with Novel Measurement and Protection Technologies ..... *
David A. Dodson, David Wetz, John Heinzel, Steve Cummings, Nick Frank, Aida Rahim, Matthew Davis

Dielectric Breakdown of Vented Li-Ion Battery Electrolyte ..... *
Charles Nybeck, David Wetz, David A. Dodson, John Heinzel

Electric Ship Design Tools for Real Time Simulation

Chair: Norbert Doerry, *Naval Sea Systems Command (SEA 05TD)*

Hardware-in-the-Loop Testing of High Switching Frequency Power Electronics Converters 299
Michele Difronzo, Matthew Milton, Matthew Davidson, Andrea Benigni

Power Hardware-in-the-Loop Simulation Testing of a Flywheel Energy Storage System for Shipboard Applications 305
James Langston, Michael Steurer, Karl Schoder, Joseph Borraccini, Don Dalessandro, Tim Rumney, Tom Fikse

Advances to Megawatt Scale Demonstrations of High Speed Fault Clearing and Power Restoration in Breakerless MVDC Shipboard Power Systems 312
Dionne Soto, Mike Sloderbeck, Harsha Ravindra, Mischa Steurer

MIMO Identification Techniques in Online Measurement of Bus Impedance of Interconnected Power-Electronics Systems 316
Tomi Roinila, Hessamaldin Abdollahi, Silvia Arrua, Enrico Santi

Computation of Time-Domain Impulse-Response from Band-Limited Ship Power Distribution Models using Wavelet Transformation 322
Maryam Rahmani, Michael Mazzola, Shantia Yarahmadian

Energy Storage and Pulsating Loads I

Chair: Giorgio Sulligoi, *University of Trieste*

Predictive Energy Management for MVDC All-Electric Ships 327
Tuyen V. Vu, David Gonsoulin, Dallas Perkins, Fernand Diaz, Hesan Vahedi, Chris S. Edrington

Distributed Independent Controls for Managing Short Circuit Faults in MVDC Power Systems 332
Qiu Deng, Roger A. Dougal

Enhancing the Robustness of Shipboard DC Hybrid Power System against Generator Failures 340
Kexing Lai, Mahesh S. Illindala

Distributed Energy Storage Allocation Algorithm for Early Stage Design 345
James Langston, Mark Stanovich, Karl Schoder, Michael Steurer

Experimental Test Bed to De-Risk the Navy Advanced Development Model 352
S. Strank, X. Feng, A. Gattozzi, D. Wardell, S. Pish, J. Herbst, R. Hebner

Power System Control Methods and Architectures I

Chair: Fletcher Fleming, *DRS Technologies*

Grounding and Fault Location in Power Electronic based MVDC Shipboard Power and Energy Systems 359
Ben Ford, Isaac Leonard, Matt Bosworth, Mischa Steurer

Model Validation of Multi-Pulse Rectifiers for Charging Capacitors 367
Brian J. McRee, David A. Wetz, David A. Dodson, John M. Heinzel, Qing Dong

Market-Based Control of Electric Ship Power Systems 372
YuQi Zhang, Aaron M. Cramer

Ensuring Stability in a Multi-Zone MVDC Shipboard Power System 380
Seth Cooper, Hashem Nehrir

Evaluation Framework for Power and Energy Management Shipboard Distribution Controls 388
Karl Schoder, Mark Stanovich, Tuyen Vu, Hesan Vahedi, Chris Edrington, Michael Steurer, Herb Ginn, Andrea Benigni, Chika Nwankpa, Karen Miu, Frank Ferrese

Advances in Circuit Protection Technology

Chair: Andrea Benigni, *University of South Carolina*

Insulation Design and Evaluation via Partial Discharge (PD) Test for Power Electronics Application 394
Yue Xu, Rolando Burgos, Dushan Boroyevich

H-Type DC Breaker Tests to Moderate Power 401
Chathan Cooke, James Gafford, Michael Mazzola, Chryssostomos Chryssostomidis

Solid State Circuit Breakers for Shipboard Distribution Systems 406
Rostan Rodrigues, Taosha Jiang, Yu Du, Pietro Cairoli, Huaxi Zheng

Solid-State Breaker Protection in MVDC Systems 414
Keith Corzine, Allan Overstreet, Tom Baragona

High Speed Disconnect Switch with Piezoelectric Actuator for Medium Voltage Direct Current Grids 419
M. Bosworth, D. Soto, R. Agarwal, M. Steurer, T. Damle, L. Graber

Electric Propulsion and Generation

Chair: Dwight Alexander, *Northrop Grumman*

Optimum Design of a Lightweight 10MW Propulsion Motor 424
Russel H. Marvin, Dylan J. Broomfield, Brian T. Helenbrook, Kenneth D. Visser

Interleaving Angle Variation Analysis for Variable Frequency PWM Drives 432
Robert W. Ashton, Michael C. Knauff, Chris J. Dafis

A Comparison of Permanent Magnet Machine Topologies for Marine Propulsion Applications 437
Andrew Kasha, Ruiyang Lin, Scott Sudhoff, Julie Chalfant, Jamal Alsawalhi

Alternating Flux Barrier Design of Vernier Ferrite Magnet Machine having High Torque Density 445
Wenbo Liu, Thomas A. Lipo

A Quantitative Comparison of Hybrid Diesel-Electric and Gas-Turbine-Electric Propulsion for Future Frigates 451
Rinze Geertsma, Jasper Vollbrandt, Rudy Negenborn, Klaas Visser, Hans Hopman

Magnetic Equivalent Circuit-Based Simulation of a 6-Phase Generation System 459
D.C. Horvath, S.D. Pekarek, T.E. Craddock

Electric Ship Design Tools for Early-Stage Ship Design II

Chair: Norbert Doerry, *Naval Sea Systems Command (SEA 05TD)*

Investigation of Product Development Tools to Aid Naval Shipboard Power Systems Design 466
R.R. Soman, C.T. Wiegand, T.A. Toshon, M.O. Faruque, M. Steurer

Graph Theory Applications in FOCUS-Compliant Ship Designs 471
Julie Chalfant, Chrys Chryssostomidis, Daniel Snyder, Mark A. Parsons, Alan Brown

Early-Stage Design of Shipboard Integrated Power Systems: CSI-Based Multiple Solutions Comparison 478
A. Vicenzutti, U. la Monaca, D. Bosich, V. Bucci, A. Marinò, G. Sulligoi, R. Pelaschiar

All-Electric Warship Load Demand Model for Power and Energy System Analysis using Exogenously Initiated Threats 486
John D. Stevens, Daniel F. Opila, Eun S. Oh, Edwin L. Zivi

Dynamic Considerations of Power System Coupling through Dual-Wound Generators 493
L.J. Rashkin, J.C. Neely, S.F. Glover, T.J. McCoy, S.D. Pekarek

System-Level Ship Thermal Management Tool for Dynamic Thermal and Piping Network Analyses in Early-Design Stages 501
Sam Yang, Juan Ordonez, Jose Vargas, Julie Chalfant, Chryssostomos Chryssostomidis

Electric Ship Design Tools for Discipline Specific Studies

Chair: Terry Ericsen, *Ericsen Innovations, LLC*

Investigation of Drivetrain Losses of a DP Vessel 508
Torstein I. Bø, Anna Swider, Eilif Pedersen

Real-Time Implementation of MVDC Shipboard Power System Reconfiguration 514
Maziar Babaei, Ruhollah Jafari-Marandi, Sherif Abdelwahed

Algorithm-Based Evaluation of Ramp Rate and Pulsed Power Loading for AC Electric Systems 520
Marie A. Lawson, Mohamed Belkhayat, Kyle L. Maynard, Doug Mintz, Jason M. Johnson

A Performance Evaluation Approach for Power Electronic CHIL Simulation Methods using Multiple Real-Time Modeling and Simulation Algorithms ..... *
Karl Schoder, Isaac Leonard, Fernand Diaz, M. Omar Faruque, Michael - Mischa Steurer, Tuyen Vu, Mike Sloderbeck, Christopher Edrington

Techniques for Accelerating Simulations of Electric Ships 528
Kurtis Kredo II, Richard Bednar, Roy Crosbie, John Zenor

Power System Control Methods and Architectures II

Chair: Christopher Edrington, *Florida State University*

Distributed Power Management for DC Distribution System with Model Uncertainties 534
Dallas Perkins, Tuyen Vu, Hesan Vahedi, David Gonsoulin, Chris S. Edrington

Distributed Control Implementation for Zonal MVDC Ship Power Systems 539
Tuyen V. Vu, David Gonsoulin, Dallas Perkins, Behnaz Papari, Hesan Vahedi, Chris S. Edrington

Control System Communication Architecture for Power Electronic Building Blocks 544
Ivan Panchenko, Jason D. Bakos, Herbert L. Ginn III

Coordinating Multiple Energy Storages using MPC for Ship Power Systems 551
David E. Gonsoulin, Tuyen V. Vu, Fernand Diaz, Hesan Vahedi, Dallas Perkins, Chris S. Edrington

High-Fidelity Modeling and Optimization of Conjugate Heat Transfer in Arrays of Heated Cables 557
Zhicheng Wang, George Em Karniadakis, Julie Chalfant, Chryssostomos Chryssostomidis, Hessam Babaee

A Predictive Engine for On-Line Optimal Microgrid Control 564
Joseph Young, Marvin A. Cook, David G. Wilson

Energy Storage and Pulsating Loads II

Chair: Giorgio Sulligoi, *University of Trieste*

Efficiency Optimization and Autonomous Converter Support via a Modular Resonance Unit 572
Christopher Scioscia, Brandon Grainger

Integration and Study of Hardware in the Loop Diesel Generator with a Hybrid Energy Storage Module for Naval Applications 580
Jacob Sanchez, David Wetz, Qing Dong, John Heinzel

Current Sharing in Parallel Cell Batteries Cycled at High C Rates 586
C.S. Westenhover, D.A. Wetz, M.J. Martin, C.G. Gnegy-Davidson, D.A. Dodson, John Heinzel

Electrical and Thermal System Considerations for MVDC Superconducting Distribution on Navy Ships 592
R.E. Hebner, A.L. Gattozzi, S.M. Strank, S.P. Pish, J.D. Herbst

Next-Generation MVDC Architecture based on 6.5 kV / 200 A, 12.5 mΩ SiC H-Bridge and 10 kV / 240 A, 20 mΩ SiC Dual Power Modules 598
Ajith H. Wijenayake, Ty McNutt, Kraig J. Olejniczak, Brandon Passmore, Alex Lostetter, Jonathan Hayes, Yusi Liu, H. Alan Mantooth

SiC Device based Optimal Design for Power Conversion

Chair: Harish Suryanarayana, *ABB Inc*

Optimal Sizing of Modular Multi-Level Converters Designed for Shipboard Applications 605
Marzieh Karami, Robert M. Cuzner

Power Electronics Building Block (PEBB) Design based on 1.7 kV SiC MOSFET Modules 612
Jun Wang, Zhiyu Shen, Igor Cvetkovic, Niloofar R. Mehrabadi, Alinaghi Marzoughi, Sungjae Ohn, Jianghui Yu, Yue Xu, Rolando Burgos, Dushan Boroyevich

Optimization of a Wide Bandgap based Generation System 620
Bo Zhang, Scott Sudhoff, Steven Pekarek, Jason Neely

A High-Power-Density, High-Speed Gate Driver for a 10 kV SiC MOSFET Module 629
C. Dimarino, J. Wang, R. Burgos, D. Boroyevich

Computationally Efficient Leakage Inductance Calculation for a High-Frequency Core-Type Transformer 635
Veda Samhitha Duppalli, Scott Sudhoff
