AIR SILK ROAD

existing

Il trasporto aereo è un'altra modalità importante della Nuova Via della Seta che è già stata sperimentata con successo ad esempio per il trasporto di frutta, frutta esportata dai mercati, oltre a quelli dell'Asia centrale, in quanto ammette notevolmente i costi e consente buoni profitti.

Dalle province dello Shaanxi, Henan, Ningxia e Xinjiang partono ilvei aerei che hanno rafforzato notevolmente gli scambi commerciali tra Asia ed Europa, così come i voli verso le città cinesi di Xian, Zhengzhou, Chengdu, Wuhan e Yiwu intensificano gli scambi economici intercontinentali.

RAIL SILK ROAD

existing

Dal settembre 2014, dopo l'apertura della tratta ferroviaria
Chongqing - Zhengzhou-Europe, circa 200 mila vagoni passano attraverso
i porti intermodali, spedendo merci come per oltre mille miliardi di dollari.
Negli ultimi due anni, il totale degli investimenti delle imprese cinesi
lungo la metà della Nuova Via della Seta ha avuto un
incremento annuale del 5,4%, mentre quello globale dalla Cina e alle
nazioni si è accresciuto complessivamente del 21%.

MARITIME SILK ROAD

L'itinerario della strada di ferro del XXI secolo è il tracciato del Marittimo del XXI secolo*, che trascorre lungo le coste marittime che sono il massimo spartiacque fra i 200 paesi, ponendo a loro volta collegamento con i 15 paesi che sono il Marittimo del XXI secolo. Il percorso inizia con il porto di Ningbo e Mianyang nel sud-est dell'Asia Orientale, dove i tre porti più grandi della Cina (Ningbo, Shanghai, Wuhan) sono porti portuali.

Quindi viene considerata una sorta di maglia strategica che prevede collegamenti marittimi, aeroportuali, commerciali e politici fra il Marittimo del XXI secolo e il porto di Venezia che si trova nel centro dell'Europa. I porti di Venezia sono spesso indicati come "porto europeo" dato che sono i porti marittimi che hanno un ruolo molto importante per i porti europei. Inoltre i porti di Venezia, Marsala e Trapani sono porti di riferimento per il settore degli impianti.
