

Special Issue

MÉLANGES: 100TH ANNIVERSARY OF THE INCEPTION OF THE TERM AND CONCEPT

Guest Editors

Andrea Festa

Dipartimento di Scienze della Terra, Università di Torino, Via Valperga Caluso 35, 10125 Torino, Italy

Kei Ogata

Department of Earth Sciences, Vrije Universiteit, De Boelelaan 1085 - 1081 Amsterdam, the Netherlands

Gian Andrea Pini

Dipartimento di Matematica e Geoscienze, Università di Trieste, Via E. Weiss 2, 34128 Trieste, Italy

CONTENTS

Mélanges: 100th anniversary of the inception of the term and concept A. Festa, K. Ogata and G.A. Pini	1
Part I: Diagnostic features in recognition of the tectonic, sedimentary or diapiric origin of mélanges	
Diagnostic features and field-criteria in recognition of tectonic, sedimentary and diapiric mélanges in orogenic belts and exhumed subduction-accretion complexes A. Festa , G.A. Pini , K. Ogata and Y. Dilek	7
Conceptual consideration and outcrop interpretation on early stage deformation of sand and mud in accretionary prisms for chaotic deposit formation Y. Ogawa	31
Sedimentary compared to tectonically-deformed serpentinites and tectonic serpentinite mélanges at outcrop to petrographic scales: Unambiguous and disputed examples from California J. Wakabayashi	51
Part II: Tectonic, sedimentary, diapiric, and polygenetic mélanges in ancient subduction-accretionary complexes and orogenic belts	
Perspectives on the roles of melanges in subduction accretionary complexes: A review L.A. Raymond	68
Tectonic setting required for the preservation of sedimentary mélanges in Palaeozoic and Mesozoic accretionary complexes of southwest Japan K. Wakita	90
Substrate deformation and incorporation in sedimentary mélanges (olistostromes): Examples from the northern Apennines (Italy) and northwestern Dinarides (Slovenia) K. Ogata , A. Festa , G.A. Pini , Ž. Pogačnik and C.C. Lucente	101
Tectonic, diapiric and sedimentary chaotic rocks of the Rakhine coast, western Myanmar G.F. Moore , L.T. Aung , R. Fukuchi , J.C. Sample , E. Hellebrand , A. Kopf , W. Naing , W.M. Than and T.N. Tun	126

Part III: Mélanges and regional geology

Middle-Late Jurassic sedimentary mélange formation related to ophiolite obduction in the Alpine-Carpathian- Dinaridic Mountain Range H.-J. Gawlick and S. Missoni	144
A giant late Precambrian chert-bearing olistostrome discovered in the Bohemian Massif: A record of Ocean Plate Stratigraphy (OPS) disrupted by mass-wasting along an outer trench slope J. Hajná , J. Žák , L. Ackerman , M. Svojtka and J. Pašava	173
Polyphase brittle and ductile deformation of Late Jurassic ophiolitic basalt-argillite matrix mélange and stratigraphic overlap sequence, northwestern Washington State D.T. Katopody and J.S. Oldow	189
Mélanges and disrupted rocks at the leading edge of the Humber Arm Allochthon, W. Newfoundland Appalachians: Deformation under high fluid pressure R.A. Lacombe , J.W.F. Waldron , S.H. Williams and N.B. Harris	216
Geochronology, geochemistry and tectonic implications of a new ophiolitic mélange in the northern West Junggar, NW China R. Zheng , L. Zhao and Y. Yang	237
Using 3D kinematic models in subduction channels. The case of the Chañaral tectonic mélange, Coastal Cordillera, northern Chile P. Fuentes , C. Fernández , J. Díaz-Alvarado and M. Díaz-Azpiroz	251
