

# Modern Trends in Research on Steel, Aluminium and Composite Structures

Edited by

Marian A. Gizejowski, Aleksander Kozłowski, Marcin Chybiński,  
Katarzyna Rzeszut, Robert Studziński & Maciej Szumigala

PROCEEDINGS OF THE XIV INTERNATIONAL CONFERENCE ON METAL STRUCTURES (ICMS2021), POZNAŃ, POLAND, 16-18 JUNE 2021

# Modern Trends in Research on Steel, Aluminium and Composite Structures

## *Editors*

Marian A. Giżejowski

*Department of Concrete and Metal Structures, Warsaw University of Technology, Poland*

Aleksander Kozłowski

*Department of Building Structures, Rzeszów University of Technology, Poland*

Marcin Chybiński

*Institute of Building Engineering, Poznan University of Technology, Poland*

Katarzyna Rzeszut

*Institute of Building Engineering, Poznan University of Technology, Poland*

Robert Studziński

*Institute of Building Engineering, Poznan University of Technology, Poland*

Maciej Szumigała

*Institute of Building Engineering, Poznan University of Technology, Poland*

## Table of contents

Foreword	xi
Preface	xiii
Acknowledgements	xv
Organisation and committees	xvii
<i>Keynote papers</i>	
Research developments on glass structures under extreme loads <i>C. Bedon</i>	3
Design of beam-to-column steel-concrete composite joints: From Eurocodes and beyond <i>J.-F. Demonceau</i>	14
Stainless steel structures – research, codification and practice <i>L. Gardner &amp; F. Walport</i>	25
Testing, modelling and design of bolted joints – effect of size, structural properties, integrity and robustness <i>A. Kozłowski, P. Kawecki, D. Kukla &amp; K. Ostrowski</i>	36
Design of hybrid beam-to-column joints between RHS tubular columns and I-section beams <i>L.S.D. Silva &amp; Y. Harada</i>	53
Selected aspects of designing the cold-formed steel structures <i>L. Sokół &amp; K. Rzeszut</i>	66
<i>Advanced analysis and direct methods of design</i>	
Experimental investigation of angle length effect – angles in tension connected by one leg <i>W. Barcewicz, S. Wierzbicki, M.A. Giżejowski, S. Labocha &amp; R. Czyż</i>	85
On elastic lateral-torsional buckling analysis of simply supported I-shape beams using Timoshenko’s energy method <i>A.M. Barszcz, M.A. Giżejowski &amp; Z. Stachura</i>	92
Numerical evaluation of dynamic response of an experimentally tested base-isolated and fixed-base steel structure model <i>T. Falborski, T. Jaroszewski &amp; R. Jankowski</i>	99
Research on the interface elements in soil-steel structures based on the in situ test <i>C. Machelski, P. Tomala &amp; M. Mońka</i>	106

Reliability analysis of tensegrity towers in a system approach <i>W. Mochocki &amp; P. Obara</i>	113
The generalized constitutive law in nonlinear structural analysis of steel frames <i>D. Mrówczyński, T. Gajewski &amp; T. Garbowski</i>	120
Impact of the self-stress state on the static properties of double-layered tensegrity grids <i>J. Tomasik &amp; P. Obara</i>	127
Calculation of a crimping point shear resistance for steel sheet piles based on a calibrated numerical model <i>J.V. Voorde, P.E. Boueiz, A. Glorieux &amp; J. Martins</i>	134
Influence of bimoment restraints on load-bearing capacity of steel I-beams <i>K. Wierzbicki &amp; M. Szumigala</i>	141
Simplified approach to assess the dynamic response of a container ship subjected to bow slamming load <i>K. Wołoszyk &amp; M. Bogdaniuk</i>	148
 <i>Cold-formed elements and structures</i>	
Cold-formed perforated uprights: Experimental evaluation of M-N domains <i>N. Baldassino, M. Bernardi &amp; R. Zandonini</i>	157
Design of semi-compact Z-shaped steel sheet pile walls <i>A. Enders &amp; U. Kuhlmann</i>	164
Elastic buckling of thin-walled beam-columns based on a refined energy formulation <i>M.A. Giżejowski, A.M. Barszcz &amp; J. Uziak</i>	171
Buckling analysis of thin-walled sigma beams with respect to different numerical descriptions <i>K. Rzeszut, I. Szewczak, P. Różyło &amp; M.J. Guminiak</i>	178
Generalized nonlinear constitutive law applied to steel trapezoidal sheet plates <i>N. Staszak, T. Gajewski &amp; T. Garbowski</i>	185
Experimental tests of second generation trapezoidal sheets <i>T. Szumigala</i>	192
 <i>Composite structures</i>	
Resistance of a new type of flat shear connectors dedicated to composite columns <i>M.P. Chrzanowski, C. Odenbreit, R. Obiala, T. Bogdan &amp; H. Degée</i>	201
Influence of type and orientation of thin-walled beams on the interaction effectiveness with sandwich panels <i>K. Ciesielczyk &amp; R. Studziński</i>	208
Experimental tests of sheeting made of sandwich panels acting as a diaphragm <i>M. Górski</i>	215
