

Combined use of Rheology and LF-NMR for the characterization of PVP-Alginates gels containing liposomes

Running title: *Characterization of PVP-Alginate gels*

Giulia Fanesi¹, Michela Abrami², Francesca Zecchin², Irina Giassi², Elena Dal Ferro¹, Anja Boisen¹,
Gabriele Grassi³, Paolo Bertocin⁴, Mario Grassi^{2*}, Paolo Marizza¹

Supplementary Information

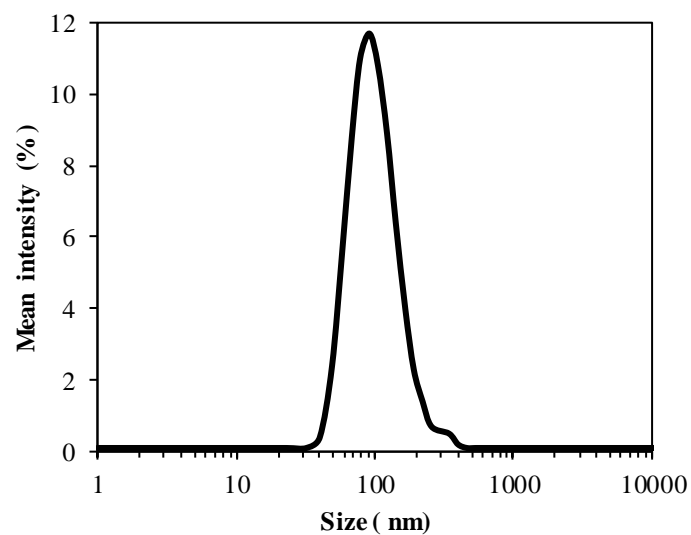

Figure S1: Example of DLS characterization of liposome suspensions after extrusion. In all cases, only one population of nano-vesicles with a narrow size distribution was found.
