Table S1. History of measurements of plasma concentrations of mycophenolate (performed by LC-MS/MS method), everolimus (performed by immunoassay method), kidney function values, liver function values, C-reactive protein values, and leukocyte population counts. MP: mycophenolate; sCr: serum creatinine; AST/GOT: aspartate aminotransferase/glutamate oxaloacetate transaminase; ALT/GPT: alanine aminotransferase/glutamate pyruvate transaminase; GGT: gamma-glutamyl transferase; CRP: C-reactive protein; WBC: white blood cells.
